Krystyna Mishchenko is a Ukrainian artist, born in 1997 and based in Chemnitz, Germany. Ceramics is her principal medium, with drawing and painting informing her sculptural language. The human silhouette, geometric form and empty space allow her to explore freedom, belonging and inner experience.

She graduated from Kharkiv Art College in 2016 and completed a bachelor's degree in 2020 and a master's degree in art ceramics in 2022 at the Mykhailo Boychuk Kyiv State Academy. Her exhibition record includes projects in Ukraine, Poland, Latvia and Finland. She has been a member of ZPAP in Warsaw since August 2022.

In 2022, she took part in the two-week international Art for Ukraine residency in Brenna and received a scholarship from Wawerskie Centrum Kultury in Warsaw for the project "Untitled. Does Goodness Have a Name".

INTENTION AND FORM

In White Poppies, a human figure and a monolithic block explore the tension between the individual and a system. In Encounters, separate objects address isolation and the need for closeness.

The elements of Identity Capital (2022), a transformative composition, can be rearranged. Viewers participate in creating new combinations, while identity emerges as an ongoing process.

COLLABORATION

Open to exhibitions, curatorial projects, residencies, commissions and ceramic compositions for interiors. I welcome collaborations in which the artistic intention develops through a dialogue with the space and the purpose of the project.
